In re Application of: Cohn et al.

Election / Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-11, 22-29, 40-50 and 51-61, drawn to designing an electrical wiring structure having a plurality of wires, classified in class 703, subclass 2.

II. Claims 12-21 and 30-39, drawn to executing a two-wire voltage transition, classified in class 716, subclass 3.

1.1 Inventions of Groups I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

In the instant case, the invention of Group I has separate utility such as satisfying a mathematical relationship which defines a spacing between the first and second wires, and a common run length of the first and second wires. The invention of Group II has separate utility such as tri-stating the second wire, transitioning the first wire to a different voltage, and then transitioning the second wire to a different voltage.

These separate uses distinguish the invention of each of Groups I and II from one another. Therefore, the invention of each of Groups I and II is a separately usable subcombination. See MPEP § 806.05(d).

1.2 Because these inventions are distinct for the reasons given above, and have acquired a separate status in the art as shown by their different classification and/or recognized divergent subject matter, restriction for examination purposes as indicated is proper.

1.3 Because the requirement for restriction is complex, no telephone communication was made. See MPEP § 812.01.

In re Application of: Cohn et al.

1.4 Applicant's are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b), if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

1.5 Applicant's are advised that a reply to this requirement must include an election of the invention to be examined, even though the requirement may be traversed under 37 CFR 1.143.
